

Configure your Store Details

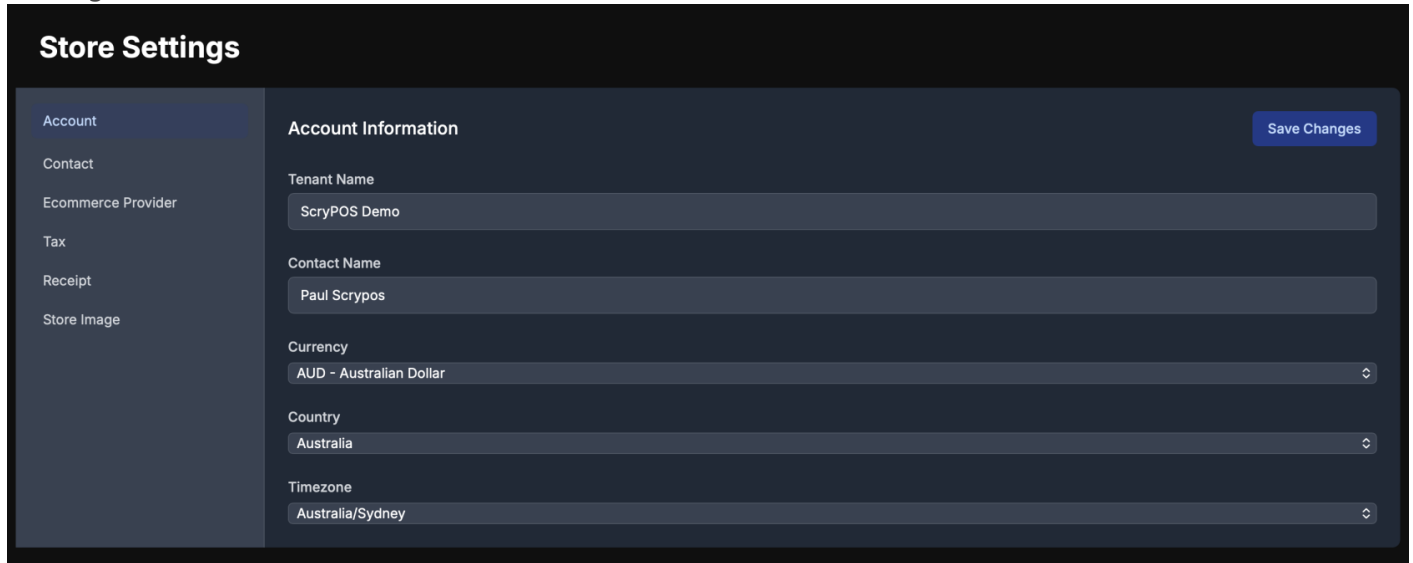

The first thing you will want to do when accessing your ScryPOS system is configure your company details.

In the left hand menu you will go Settings > Store

Account Details

These will all be set by the ScryPOS team as part of onboarding, but you should verify these settings are correct:

Store Settings

Account Information Save Changes

Tenant Name
ScryPOS Demo

Contact Name
Paul Scrypos

Currency
AUD - Australian Dollar

Country
Australia

Timezone
Australia/Sydney

- **Tenant Name:** the name by which your store is known
- **Contact Name:** the name used by ScryPOS to identify the owner of the store
- **Currency:** the currency for all sales and purchases within the system. AUD (Australian dollars) is the only currency supported at this time:

NOTE: the currency selected here MUST match the configured currency in your Shopify store

- **Country:** controls country-specific settings and options through ScryPOS. Australia is the only country supported at this time
- **Timezone:** allows ScryPOS to identify what times may be more suitable for downtime, such as system upgrades or backups

Contact Details

Update the Primary Company Contact details in Store Settings > Contact

For stores using ScryPOS's Multi-Location system billing for all locations will be sent to the billing contact email.

The address is used as the company's primary billing address. Location addresses will be configured later in Shopify.

Ecommerce Provider

By default all stores will be using Shopify for the foreseeable future at the time of writing this.

Shopify limits the number of variants that can be created by external programs to 1000 in any 24 hour period. The Reserve Shopify Quota setting allows you to reserve some number of these operations for programs other than ScryPOS. Setting this to a high number will reduce the rate at which new products can be added you your store automatically.

Reserve Shopify Quota

Shopify provides 1000 create actions per 24 hours. This setting reserves a portion of that quota for non-Scrypos actions.

☐ Registered for GST

Trading Name

Leave empty to use the tenant name

The trading name to display on receipts and invoices.

Tax settings are disabled. Enable "Registered for Tax" to configure tax types and registration numbers.

Receipt Settings

ScryPOS will generate customer receipts on all transactions that can be sent as tax invoices. These are the settings that control what customers will see on their receipts from sales at locations linked to this account.

(Changes coming here soon - currently this is configured for all locations to use the same receipt settings)
