

Create Tills and Kiosks

Creating a Till

Here you can create your tills! You can many or few based on your specific needs. It is recommended to be pretty strict with how these tills are configured and used as there is a lot of reporting built into ScryPOS that allows you to analyse and report on the performance of your tills. This means if you trade at a market, card show, in store or vend on the road, if you have a till for each situation you can run analytics on each till to assess their performance against each other.

Go to Tills > Manage

Create Till

Creating and Connecting a Kiosk

1. Check with ScryPOS support (support@scrypos.com) that kiosk support is enabled for your account.
2. Open the Tills->Manage menu and click Create Till
3. Enter the name of the new Kiosk till and ensure the "Enable kiosk mode for this till" checkbox is enabled:

☒ Enable kiosk mode for this till

4. Click "Create Till", and the list of tills will be displayed including the new kiosk till you just created.
5. Click on the "Edit" button on the row for the kiosk till. The following dialog should appear:

Edit Till

Name:
Kiosk 2

Description:
Enter till description

Inventory Location:
None

☒ Enabled
☒ Kiosk Mode

Kiosk devices

Device label (optional) Add device

No devices registered for this till. Use Add device to create a bookmark URL for an existing kiosk.

Payment Methods:

☐ Cash
☐ Credit Card
☐ Direct Deposit
☐ EFTPOS
☐ Square
☐ Store Credit

6. Click on the "Add Device" button, and informaton similar to the following will appear:

Copy now — shown once

Set this as the kiosk browser home page. Any previous bookmark for this device no longer works.

Bookmark URL

<https://dev.scrypos.com/kiosk?d=58160789> 

Dismiss

This gives the URL that must be copied to your Kiosk machine to open the kiosk page.

7. Click on the "copy" icon (shown below) to copy the new URL to the clipboard. From there, transfer the URL to the target kiosk device. This URL remain unchanged unless you choose to regenerate it.

8. Close the edit till window by clicking Cancel.

9. On the target kiosk device, open the bookmark URL. A dialog similar to the followng will appear:

Kiosk link

Show this code to staff for till Kiosk 2 in
Tills → Link kiosk.

6 6 4 6 3 3

Take a note of this number. It will be needed later.

IMPORTANT NOTE!!!

OPENING A KIOSK IN THE SAME BROWSER AS THE SCRYPOS DASHBOARD IS NOT SUPPORTED!

ALWAYS USE A DIFFERENT MACHINE OR A DIFFERENT BROWSER (I.E. FIREFOX VS CHROME)

10. On the ScryPOS dashboard, open the Tills->Manage menu and find the kiosk in the list of tills. Click on the row, and the following dialog will be displayed:

11. Click on "Link kiosk device", and the following dialog will be displayed:

12. Enter the number that was displayed by the kiosk in step 9, and click "Link kiosk".
13. The kiosk page should now refresh and show a page similar to the POS page. The kiosk is now active!
14. Open the Tills->Manage menu and find the till that will be used to process kiosk purchases. Click on the "Edit" button for that row, and find the "Kiosk parked queue sources" section.

In this section, check the box next to the kiosk and the click "Save Changes"

Kiosk parked queue sources:

Parked sales from selected kiosk tills appear on this till for checkout.

Kiosk

Kiosk 2

15. When a kiosk user submits their purchases, you can now access the sale through the Parked menu of the primary till.
